InnoVet[®]

THE MOST TRUSTED NAME IN VETERINARY RADIOGRAPHY

VERSA

By InnoVet

DR

SETTING A NEW DIGITAL STANDARD

Since space is a luxury in many veterinary practices, the stationary-top Versa DR system has only a 34" x 81" footprint--20% smaller than previous systems.

VERSA DR's SLEEK DESIGN ALSO PROVIDES EXTRAORDINARY SAFETY:

- Encased x-ray tube reduces radiation leakage by over 50%.
- A unique tube column and tube cover safeguard staff & patients from exposed electrical wires.
- Rounded corners prevent hip-level bruising common to veterinary technicians.
- High-quality collimator meets Federal radiation leakage requirement for human applications.

SIMPLE USER INTERFACE

An intuitive graphical interface offers point & click functionality for speedy image selection.

When integrated with practice management software, patient studies may be pre-loaded within the patient record.

STREAMLINED PATIENT CARE

User-friendly acquisition software integrates with most practice management systems to electronically integrate radiographic studies with lifetime medical records.

WITH THE LOWEST OVERALL COST OF OWNERSHIP

Versa DR is a fully-integrated digital imaging solution. It does not rely on cassettes or cassette-readers that are easily contaminated and wasteful.

CUSTOMIZED TO YOUR NEEDS

You should only pay for the features you need, so we offer options like:

- Anatomical Programmed Technique Selection
- Upgrade to 500mA Power (300 mA standard)
- 4-Way Float-Top Table
- Hands-Free Collimator Light Activation

ACQUIRE & EDIT IN SECONDS

Make image adjustments and diagnoses on the spot so you can treat patients and inform clients in record-time.

PRECISION IMAGING

System to obtain digital images for all species from 100g to 7 gram finches. Add to all these benefits of support and you have the best digital x-ray system on the market."

BYRON J.S. NAVARRA, D.V.M.

KEEP EVERYONE CONNECTED IN REAL-TIME

The well-being of a companion-animal affects more people than just the client you advise. Versa DR lets you easily share patient results with staff or outside radiologists via DICOM transfer.

You can also convert images to common viewing formats (.jpg, .bmp, .tiff) and burn them to CD/DVD, or email them immediately to a home computer or web-enabled smart phone.

DURABLE. VERSATILE. DIGITAL.

GO DIGITAL WITH InnoVet®

INNOVET MEANS INTEGRITY

InnoVet revolutionized veterinary radiography in 1991 with the first x-ray system designed by veterinarians.

Since then, InnoVet has manufactured more than 6,000 veterinary x-ray systems, making it the #1 veterinary x-ray manufacturer in the United States.

Add to that, the industry's best warranty and it's no wonder InnoVet is the most trusted name in veterinary radiography.

AMERICAN MADE

All InnoVet x-ray systems are built in our ISO 9001 certified factory in Chicago, IL. With support staff and materials on-site, most systems and parts can be shipped from our facility the same day.

LOCAL SUPPORT

Capital equipment is a long-term investment that deserves personal attention from a service professional who understands your practice.

Regional InnoVet dealers are factory-trained to install and service your x-ray system with immediate on-site support. Your local InnoVet dealer will provide remote technical support as well. Our trusted support network means image quality will never slow down your practice.

NOT READY FOR DIGITAL RIGHT NOW?

When you know digital imaging is in your future, check out Versa.

Versa is the premiere radiographic solution for veterinarians who plan to upgrade to digital imaging later on. Versa by InnoVet comes with all the components you've seen here, without the digital receptor.

When the time is right, you may add the digital components at a special price – and maintain your original parts warranty.
